

SMARTALLY™ DISPLAY EDITION

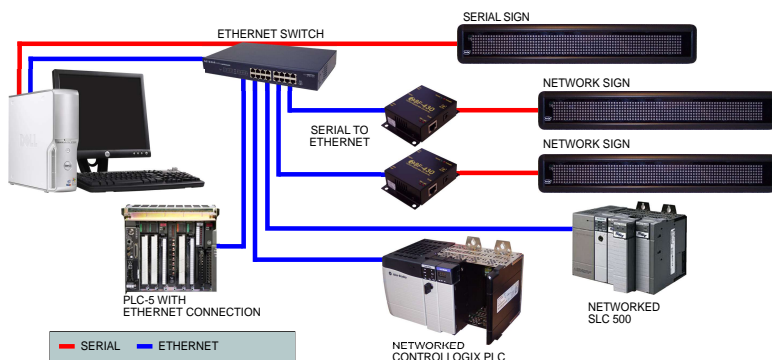

SERVE MESSAGES TO MULTIPLE MESSAGE DISPLAYS
USING DATA FROM YOUR EXISTING PLC NETWORK

Overview

SmarTally™ DE is a powerful tool for communicating with numerous message displays using your existing PLC network. It contains functionality for communicating with serial and ethernet devices while reading data from multiple PLC sources.

Our simple single-step process ensures that adding new messages to displays is fast, and with features like expiry dates and custom message formatting, SmarTally™ DE is the only program your mill will need to serve messages to multiple displays on your existing PLC network.

A Potential Installation
